Treated Pigments for Color Cosmetics

Jojoba Ester Treatment (NJE Treatment) - Kobo's patent pending process enables pigment particles to be rendered hydrophobic with this treatment. This treatment offers a creamy feel and good affinity to the skin. Due to their good pressability these products are recommended for use in powders, as well as emulsions and hot pours.

Silica Treatment - The silica coating on these substrates helps to prevent color change and/or a darkening effect of the pigment on the skin when it comes in contact with water or oil.

- BRO-C5: *Iron Oxides (C.I. 77491) (And) Silica*
- BYO-C5: *Iron Oxides (C.I. 77492) (And) Silica*

Microspheres

Due to their optical blurring properties these naturally derived spherical powders will diminish the look of fine lines on the skin while enhancing the feel of your product.

Silicas - These products range in oil absorption properties. Higher Oil absorbing silicas can contribute to oil control on the skin.
