SECTION 7: HANDLING AND STORAGE

Handling :

Good industrial hygienic practice requires that employee exposure be maintained to below the recommended TLV. This is preferably achieved through the provision of adequate ventilation where necessary. When dust cannot be controlled in this way, personal respiratory protection should be employed. Follow all MSDS and label precautions even after container is emptied since it may contain residual material.

Storage :

Store containers closed in a cool dry place. Avoid storage in areas above 40 degrees Centigrade. Avoid direct sunlight, heat, sparks, and open flames.
