Manufacturing Procedure

1. Micropulverize Part 1 without the KTZ® Interfine Gold until color is fully developed.
2. Spray the pre-warmed (65-70°C) Part 2.
3. Blend well and micropulverize. Add the KTZ® Interfine Gold and mix well.
4. Press at 200 psi.

Description

This powder blush combines two D&C Colors that are treated with Isopropyl Titanium Triisostearate which improves the smoothness of the application to the skin and helps to prevent color change during the day. KTZ® Interfine Gold provides shimmer and a warm, golden undertone to the product. Silky Talc FK-300S is a creamy talc that serves as an excellent base for the overall formulation. SS4267 binds the pigments and powders together and improves wear and moisture resistance.
