## Description:

The combination of KOBOGUARD® 5400 IDD and KOBOGUARD® 50AMP-G offers great long-lasting properties to the formulation. COSMOL™ 182V is an emulsifier that contributes to product stability. SW65U is a pigmentary dispersion used to disguise the yellowish aspect given by waxes, and improve formula aesthetics. MSS-500/20N is a non-porous silica microsphere that offers volume to the lashes and KNY-3D is a nylon fiber that lengthens the lashes.

## Manufacturing Procedure:

1. Combine Part 1 and heat to 80° C until homogeneous. □
2. Combine Part 2 and prop mix until homogeneous. □
3. Cool Part 1 to 40° C while prop mixing. □
4. Slowly add Part 1 to Part 2 and cool to 30° C. □
5. Slowly add Part 3 to batch until homogeneous.
