## Description:

This long-lasting, non-transfer and highly-pigmented color concentration hot pour formula is positioned as a stage makeup tool. It can be used on both face and body. The formula features PT1BM70R pigmentary dispersion in low viscosity Phenyl Trimethicone, which offers full color development and eases the manufacturing process. VEGETABLE WAX-SS1 (Non-GMO) is used to structure the formulation in combination with NOMCORT® HK-G, an oil phase gellant, that also can help to improve formula stability. For adhesion and substantivity of the formula to the skin, water-resistance and rub-resistance, the optimized blend of film formers KOBOGUARD® HRPC and KOBOGUARD® MQ75ETS is added. MST-547-FS provides a silky slip during application. FS treatment shows both water and oil repellency, which contributes to adherence and long wear.

## Manufacturing Procedure:

1. Add Part 1 ingredients and heat to 80 °C until wax is completely melted. □
2. Add Part 2 and mix well until homogeneous.
3. Add Part 3 and mix well until homogeneous.
4. Pour the bulk into component.
