Manufacturing Procedure

1. Weigh and add Part 1 raw materials to the Waring Blender under a fume hood. Mix for 2 -3 minutes.
2. Pre-mix Part 2.
3. Add Part 2 slowly to Part 1 under a fume hood. Mix for 2 minutes.
4. Add the KTZ® Pearls and mix for 1-2 minutes.

Description

A blend of soft Micas provides superior application when combined with a silky, smooth Talc. A surface treatment of Triethoxysilylethyl Polydimethylsiloxyethyl Methicone on the pigments provides compatibility with the binder and extends the wear. This background is then combined with KTZ® Pearlescent Pigments, some having special effects, to deliver a multicolor glow to liven the skin tone. A combination of Microspheres, SP-10 and BPA-500, helps to provide soft focus. Skin benefits are delivered via a combination of Silicone and Vitamin E.
