Description:

This liquid blush is characterized by a fresh and light feel upon application with fingertips and provides a healthy rosy hue and natural glow that can be easily built up to the desired level of color. A w/si format allows a quick-dry application which is reinforced by KOBOGUARD® MQ60DM without imparting any stickiness. CPF-3300@20cSt is used as part of the oil phase to contribute to the dewy effect and silky feel. INBP dispersions used at very low levels impart color and make it easy to obtain batch-to-batch reproducibility. This microplastic-free formulation utilizes MSS-500/N in combination with CELLULOBEADS D-5-ASG3, to impart a soft, ball bearing effect. KOBOPEARL® EF-8 is used to provide glow and is chosen for its compatibility with this w/si formula, good dispersibility and skin affinity. KTZ® CELANDON GOLD-11S2 is a surface treated pearl that adds to the glow, without affecting the viscosity of the emulsion.

Manufacturing Procedure:

1. Weigh all the pigment dispersions from Part 1 and mix. Add the rest of the ingredients and homogenise with Silverson round hole head at 3000 RPM for 3 min.
2. Prepare Part 2
3. Make the emulsion by adding Part 2 to Part 1 under propeller stirrer at 1000 RPM
4. Add powders of Part 3 under propeller stirrer
