Description:

This Bouncy Bronzer formula contains MST-547, which acts as a payoff enhancer. CXG-1104 is a silicone elastomer that provides a silky, powdery after feel. Silane treated filler GMS-11S2 allows us to make a soft-to-touch, texturized cake. This material, in conjunction with ITT treated pearls, contributes to silky feel, bouncy texture and long wear properties. KTZ® BRONZE D OR-I2 and KTZ® BOLERO CROMATICO-I2 offer a unique pearlescent bronzing effect. K-RAY® SM BRONZE FLASH adds a unique orange-gold glittery appearance and long-lasting buildable payoff. PM WAX 82 is a combination of waxes used to structure the formula.

Manufacturing Procedure:

1. Combine Part 1. Mix until homogeneous. Start to heat up to 80°C.
2. Add Part 2. Mix and maintain 80°C until all dissolved and clear.
3. Sprinkle Part 3 slowly, mix until uniform.
4. Pour into pans.
