Description:

This anhydrous long lasting eyeliner features KOBOGUARD® 5400 IDD, a film former that forms a water-resistant film to provide long wear to this formula. PMLVP20CB is a dispersion of Black 2 in Isododecane, offering deep and intense color to this eye liner. COSMOL® 222 is a pigment dispersant that offers great stability against oxidation. MSS-500W is a silica microsphere that improves payoff and allows the eye liner to have a smooth application. PM WAX 82 is a combination of waxes used to structure the formula, along with NOMCORT® HK-G, which is an oil gelling agent that can increase viscosity and improve formula stability.

Manufacturing Procedure:

- *Use explosion-proof mixers and equipment during batching process*
1. Combine Part 1 and heat to 90°C. Mix well under propeller until color is fully dispersed.
 2. Cool to 80°C and add Part 2.
 3. Pour into components.
