Description:

This velvet anhydrous system can be used as a lipstick, blush or eyeshadow. Its color is due to Kobo's INBP treated pigments dispersions, which give the most saturated and vivid color to this formula. SALACOS® 5418V is an ester that improve skin feel and adhesion. MSS-500/5H gives a comfortable matte finish with a non-tacky after feel. KOBOGUARD® HRPC is an oil-soluble film former that helps with product wear and long lasting. EXCEBEADS™ CS-725 is a high purity, non-porous, spherical fused silica microsphere; it provides a smooth and silky feel and serves as a high performing alternative to plastic beads. KOBOGUARD® 5400 IDD is a film former that offers long wear and water resistance. The discrete shine of this formula is due to the combination between K-RAY® SM MOLTEN METAL and KTZ® CELANDON GOLD to give a slight satin shine to the eyes, cheeks and lips.

Manufacturing Procedure:

1. Add all ingredients to the main vessel and mix 900 rpm while start heating up to 85°C.
2. Start cooling up to 60°C and add the remain ingredients. Mix 900rpm for 5 minutes.
