Description:

This clean foundation leaves the skin feeling soft, while providing even coverage and a slightly dewy finish. The coverage and shade of this foundation is due to the ASGP treated pigments. They disperse easily into the formula and promote better wear properties due to the ASGP treated pigments' adhesion to skin. Plandool™-MAS adds moisturizing and barrier protection to the skin. ASO-NJE2 offers a uniform application and creamy after feel. In this formula, it is being used as a substitute for Nylon-12.

Manufacturing Procedure:

1. Combine Part 1 and heat to 80°C while propeller mixing.
2. Cool to below 70°C and add Part 2 to Part 1 under homogenization.
3. Add Part 3 to batch under homogenization.
4. Premix Part 4 and add to batch under homogenization, followed by Parts 5 and 6.
