Description:

This fluid highlighter formula in w/si format provides a quick-dry application and longer wear that is reinforced by KOBOGUARD® MQ60DM, which even at a relatively high use level does not give any stickiness. DM57M5 is used to help suspend the pearlescent pigments and stabilize the emulsion. The lead role is played by a total of 10% alkylsilane treated pearlescent pigments that disperse perfectly in this w/si base (which is not the case if untreated pearls are used) and don't thicken the formula unnecessarily. KTZ® CLASSIC WHITE, KTZ® STELLAR WHITE, KTZ® CELANDON GOLD and KTZ® ARUBAN CORAL combine to give a skin tone color to the bulk and provide a liquid light effect to the skin.

Manufacturing Procedure:

1. Add Parts 1 to 5 in sequence, mixing after each addition.
- 2[Ⓜ] Prepare Part 6.
- 3[Ⓜ] Make the emulsion by adding Part 6 to Parts 1-5 under prop stirrer. 1000 rpm.
- 4[Ⓜ] Add Part 7.
